DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, as recited in claim 3, the "tailgate bracket" (line 26), "tailgate-bracket member" (lines 31 & 38), "tailgate-bracket appendages" (lines 27, 30, & 36), "bottom extensions" (line 27), and "mirror bracket (line 35) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species of the claimed invention: the species shown in Figs. 1, 6, 8-9 the species shown in Fig. 2, the species shown in Fig. 3, 7, 10, the species shown in Figs 4-5, 11-14, and the species shown in Figs. 15-16..

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3611

4. During a telephone conversation with Edward Livingston on 26 March 2004 a provisional election was made without traverse to prosecute the species shown in Figs 3, 7, & 10 claim 3. Affirmation of this election must be made by applicant in replying to this Office action. Claims 4-15 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Note that claim 15 recites the attachment rod (20) and holder rod (21) which are not part of the elected species.

Specification

5. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

In claim 3, the terms "tailgate bracket" (line 26), "tailgate-bracket member" (lines 31 & 38), "tailgate-bracket appendages" (lines 27, 30, & 36), "bottom extensions" (line 27), and "mirror bracket (line 35) do not appear in the specification.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3611

In claim 3, it is unclear what elements the "tailgate bracket" (line 26), "tailgate-bracket member" (lines 31 & 38), "tailgate-bracket appendages" (lines 27, 30, & 36), "bottom extensions" (line 27), and "mirror bracket" (line 35) are referring to.

Allowable Subject Matter

8. Claim 3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Beck et al., Wilcox et al, Mazarac, Howard, Brewington, Staggs, Roberson, Haworth, Quesada, and Neeley disclose mirrors attachable to a vehicle tailgate.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Hurley whose telephone number is 703-308-0233. The examiner can normally be reached on Monday-Friday 9:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on 703-308-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
